

## dairy cattle feeding and nutrition

Thu, 06 Dec 2018 00:38:00 GMT dairy cattle feeding and nutrition pdf - Dairy cattle (also called dairy cows) are cattle cows bred for the ability to produce large quantities of milk, from which dairy products are made. Dairy cows generally are of the species *Bos taurus*.. Historically, there was little distinction between dairy cattle and beef cattle, with the same stock often being used for both meat and milk production.. Today, the bovine industry is more ... Thu, 06 Dec 2018 18:39:00 GMT Dairy cattle - Wikipedia - Different cattle feeding production systems have separate advantages and disadvantages. Most cattle in the US have a diet that is composed of at least some forage (grass, legumes, or silage).In fact, most beef cattle are raised on pasture from birth in the spring until autumn (7 to 9 months). Then for pasture-fed animals, grass is the forage that composes all or at least the great majority of ...
