

Mon, 16 Jun 2014 23:59:00 GMT propagation dynamics on complex networks pdf - Social network analysis (SNA) is the process of investigating social structures through the use of networks and graph theory. It characterizes networked structures in terms of nodes (individual actors, people, or things within the network) and the ties, edges, or links (relationships or interactions) that connect them. Examples of social structures commonly visualized through social network ... Tue, 04 Dec 2018 14:59:00 GMT Social network analysis - Wikipedia - We show, via a massive ($N = 689,003$) experiment on Facebook, that emotional states can be transferred to others via emotional contagion, leading people to experience the same emotions without their awareness. We provide experimental evidence that emotional contagion occurs without direct interaction between people (exposure to a friend expressing an emotion is sufficient), and in the complete ... Thu, 06 Dec 2018 20:26:00 GMT Experimental evidence of massive-scale emotional contagion ... - Artificial neural networks (ANN) or connectionist systems are computing systems vaguely inspired by the biological neural networks that constitute animal brains. The neural network itself is not an algorithm, but rather

a framework for many different machine learning algorithms to work together and process complex data inputs. Such systems "learn" to perform tasks by considering examples ... Thu, 06 Dec 2018 17:42:00 GMT Resolve a DOI Name - A Hopfield network (HN) is a network where every neuron is connected to every other neuron; it is a completely entangled plate of spaghetti as even all the nodes function as everything. Each node is input before training, then hidden during training and output afterwards. The networks are trained by setting the value of the neurons to the desired pattern after which the weights can be computed. The Bank continues to broaden its research and analysis of

structural and sectoral issues, while establishing research partnerships with outside institutions and individuals. Wed, 05 Dec 2018 17:07:00 GMT Research - Bank of Canada - 1. Introduction. Fractures such as joints, faults, veins and bedding planes are ubiquitous in crustal rocks. These naturally occurring discontinuities often comprise complex networks and dominate the geomechanical and hydrological behaviour of subsurface rocks. Understanding of the nontrivial effect of fractures is a challenging issue which is relevant to many engineering applications such as ... Sat, 08 Dec 2018 07:59:00 GMT The use of discrete fracture networks for modelling ... - Neural networks, or more precisely artificial neural networks, are a branch of artificial intelligence. Multilayer perceptrons form one type of neural network as illustrated in the taxonomy in Fig. 1. This article only considers the multilayer perceptron since a growing number of articles are appearing in the atmospheric literature that cite its use.
